WELCOME TO THE FUTURE

UNLOCK THE DIGITAL POTENTIAL OF YOUR ASSETS

Utilising TESTntel's smartest software, our Tel Tags provide you with a sophisticated, but simple, solution to link up all your physical assets - from rooms, coffee machines to cars - to your digital infrastructure.

Once tagged, your assets will be able to 'talk to' and integrate with your existing systems or can be easily linked up to existing and new relevant applications.
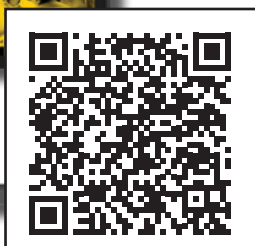

TEL TAG
ONE TAG, MANY POSSIBILITIES

Type: Sticker
Sleek & discreet design
Size: 20mmx20mmIn-built
NFC Tap & Access

BENEFITS OF TEL TAG

Improved customer satisfaction

Tel Tags create a seamless and simple process for customers to report faults, make requests and provide feedback with the simple tap of their phone. By removing the effort involved in communicating requirements and giving feedback, Tel Tags make it easier to understand customers and staff needs, and improve satisfaction.

Streamline your operation

By connecting your physical assets to the digital world with Tel Tags, you can effectively automate asset and facility management processes and streamline your health and safety compliance procedures.

## Drive engagement with your digital systems

Tel Tags create a physical and tangible connection to your digital infrastructure, making it easier for customers to interact with your existing systems and processes, maximising their value and driving greater engagement and insights.

Full visibility of your assets

TESTntel's asset management portal and asset cataloguing app make it easy to maintain full inventory of your tagged assets, empowering your business with complete online visibility of your asset portfolio, including photographs, location, make, model and condition of each asset.

Built for enterprise

TESTntel's Tel Tag system is designed to efficiently manage, organise and process millions of assets, providing connectivity with enterprise ticket management and asset management systems through open API's.
